

freestanding shield

assembly & care instructions

Two people recommended for assembly.

1 Remove all items from the carton and check for proper contents and quantities. Each Freestanding Shield includes:

2 Your Shield was inspected and carefully packed. If it arrived cracked or broken, it is likely due to poor handling during shipping. Report immediately to 3branch who will assist you with a shipping claim. Call 877.899.9902.

3 OPTIONAL: Install 3 non-skid rubber discs on the bottom of the feet with one in the center and one at each end.

4 Remove the protective coating sheets from both sides of the panels and lay clear acrylic panels on a work surface with the panel slots extending over the edge.

5 Slide the slots on the feet into the slots on the panel until the two pieces connect.

6 With a 2nd person, grasp the feet and one side of the panel and rotate the top of the panel up, then set the Shield upright on the work surface. The assembled Shield should always be moved by 2 people.

**For ganging and care instructions, see back..

assembly & care instructions - continued

- 7 OPTIONAL: Gang two or more shields together. Lay second Shield panel over the first and align the two ganging holes along the side. Use two binding posts and one neoprene washer in each of the two ganging holes to connect the two panels.

- 8 OPTIONAL: Install 3 non-skid rubber discs on the bottom of the feet with one in the center and one at each end.

- 9 Slide the slots on the feet into the slots on the panel until the two pieces connect.

- 10 With a 2nd person, grasp the feet and one side of the panel and rotate the top of the panel up, then set the Shield upright on the work surface. The assembled Shield should always be moved by 2 people.

care instructions

Clean with a damp, soft cloth only. For major cleaning, use Novus No. 1 cleaning solution. DO NOT use window cleaning sprays, scouring tools, acetone, benzene, alcohol, or lacquer thinner for cleaning.

Hairline fractures are normal and may occur with use. They do not affect functionality or product aesthetics.
